Welcome to Idealspaten!

We are pleased that you want to find out more about our company. Since the business establishment in the year 1899 "Idealspaten" produced and sold more than 100 millions of high-quality spades and other tools for the requirements of building and garden industry.

Years of experience and awareness of quality are important premisses for the production of high-quality tools, made in Germany, either for hobby gardeners or professional users.

Through well-directed diversification Idealspaten nowadays offers a product range , which includes, besides spades, shovels, forks, hammers, also different hand-tools for gardening as well as wear parts for agricultural machines.

In order to cope with the permanent increasing demands of the market Idealspaten has invested and still invests extensively in the location "Germany".
