## Master keying system

EZCURRA has developed a masterkeying system that provides Comfort, Performance and Security. For comfort, Ezcurra's master keying system affords the possibility to reduce the usual bunch of keys to only one, able to open the most commonly used locks and cylinders. High Performance and Security, due to the precision and excellent technical features of our cylinders, which allow all kind of keying systems, from the simple master key suite to the grand master key one.

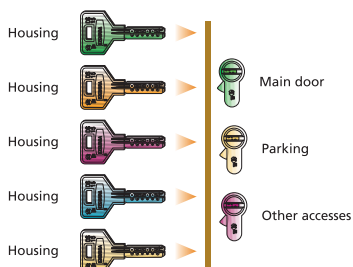

In this way, house entrance doors, post boxes, elevators, garages, desk, and so on, all can be easily masterkeyed to user's convenience.

Nowadays housing, condominiums, offices, hospitals and companies of any size enjoy the quality and security of EZCURRA's master keying system.

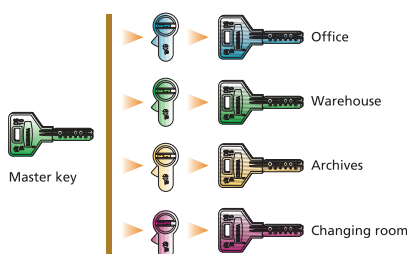

### Communal Entrance Master keying

Group of Locks each one having its own individual key that gives access to its own door and all communal services i.e.: main entrance, garage, lift, terraces, storerooms, etc.

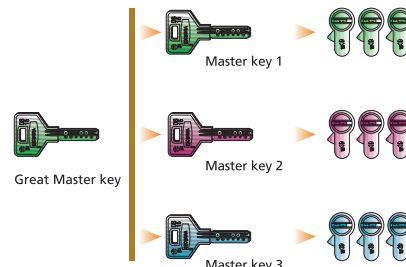

### Simple Master keying

Group of Locks each one having its own individual keys, which opens only that door, and a Master key which opens all the locks. Suitable for offices, warehouses, etc.

### Group Master keying

Several independent groups of Locks each one having its own Master key, and a Grand Master key, which opens all the doors in the locking plan. Suitable for hotels, administrative buildings, schools, companies, etc.

## DS-15

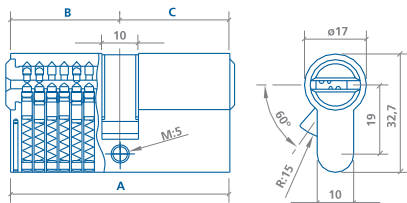

## DS-10

### Common features

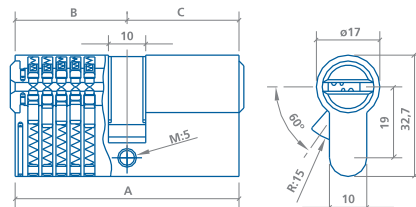

- High security double cylinder with european profile.
- Anti - picklock profile.
- Front drilling resistant.
- High keying possibilities.
- Wide range of sizes, finishes and models: knob cylinders, half-cylinders, switch cylinders, double clutch cylinders, etc.
- *Finishes:* Brass/Chrome  
Matt chrome/Black
- **COMPLETELY MADE IN SPAIN**
- Cylinder complies with certification CE UNE-EN 1303:2006

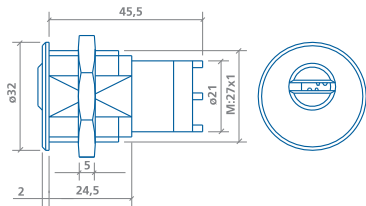

Cylinder DS-15

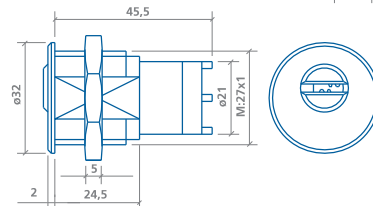

Cylinder DS-10

Switch cylinder DS-15

Switch cylinder DS-10

- Double fitting 9 pins in two rows: 3 up + 6 down.
- Front drilling resistance by tempered steel bars.
- 5 Reversible dimple keys on chromed brass.

- Double fitting 10 pins in two rows (5 up + 5 down) + 1 steel ball on the side.
- Front drilling resistance by tempered steel bars in tube and drum.
- 5 Reversible dimple keys on nickel silver.

● Available in double clutch version.

## K-20

## K-30

### Common features

- High security cylinder with **17 pins** (12 in two rows + 5 in an extra side row) acting to achieve a sophisticated security system which increases exponentially its **master keying** possibilities.
- **Anti-picklock** and **antibumping** european profile.
- **Front drilling resistance** by tempered steel ring in the drum and tempered steel bar in the tube.
- Wide range of sizes and versions: knob cylinders, double clutch cylinders, half cylinders, switch cylinders, etc.
- Finishes: Brass / Chromed brass / Matt chrome / Black
- **COMPLETELY MADE IN SPAIN**
- Cylinder complies with certification CE UNE-EN 1303:2006

- Triple fitting 17 brass pins in 2 rows of 6 pins + 1 extra row of 5 pins on the side.
- 5 Reversible dimple keys on chromed brass.

- Triple fitting 17 STAINLESS STEEL pins in 2 rows of 6 pins + 1 extra row of 5 STAINLESS STEEL pins on the side.
- 5 Reversible dimple keys on nickel silver.

### Security cards

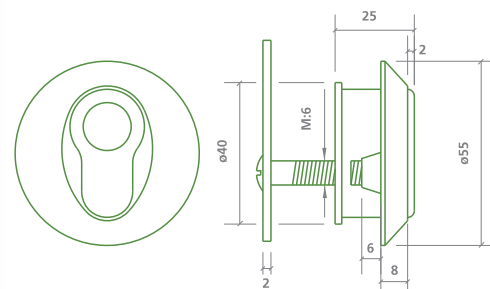

- High security double cylinders SEA-23 and SEA-3.
- Front drilling resistant by tempered steel bars.
- Five reversible nickelsilver keys.
- It combines a double row of suspended pins with an extra row at the flank, performing a perfect multilock system.
- High keying possibilities.
- Wide range of sizes, finishes and models: knob cylinders, half-cylinders, switch cylinders, etc.
- *Finish: Chrome*

## Common features

- Useful protective escutcheons for our whole range of high security european profile locks.
- Specially designed to avoid grasping actions.
- *Finishes:* Golden / Matt Chrome / Nickel / Bronze / Black enamel / Chrome
- Stainless steel in 420-P, 425-P and 430-P

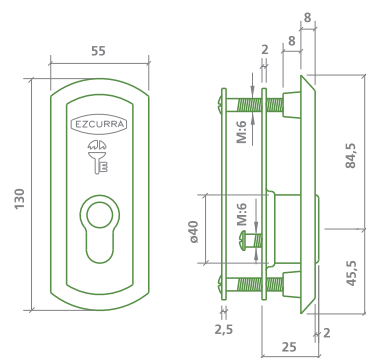

## 420-P

- Including three pieces: *escutcheon, internal plate* and *tempered steel cylinder's cap* with an edge that protects the cylinder from being extracted.

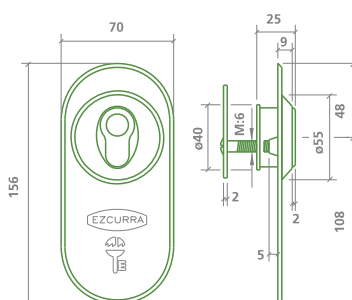

## 424-P

- Double security escutcheon.
- Including three pieces: *escutcheon, internal plate* and *tempered steel cylinder's cap* with an edge that protects the cylinder from being extracted.
- The *escutcheon* is fastened through the *internal plate* by a strong screw fixing system. The *cylinder's cap* is fixed by two screws through the lock.
- Available *steel plate* to be placed between the lock and the door's armouring sheet which provides highest protection of the lock and the cylinder, and avoids taking the cylinder's cap out.
- Available *decorative plate*.

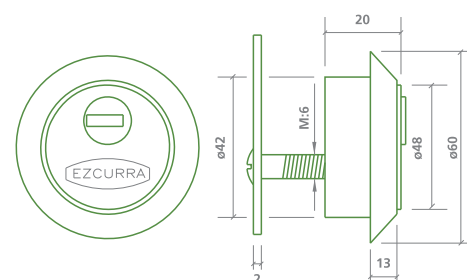

## 425-P

- 420-P escutcheon plus decorative plate.

## 430-P

- Including three pieces: *tempered steel escutcheon, internal plate* and *brass cover*.
- Hidden cylinder.
- Available washers for exact assembly.
- *Decorative plate* on request.

The security set  
made up of:

- **Z profile lock**
- **Angular striking plate**
- **Security hinge**
- **Crosspieces**

provides the door structure with  
great strength, achieving a very  
sturdy security system.

## Long angular striking plate

■ 45 mm.  
x 2,03 / 2,11 m.

## Hinge

■ U+L shaped reversible SECURITY HINGE with 4 bearings, available in the following finishes and sizes:

Golden / Matt Chrome / Nickel  
Bronze / Black enamel on Steel

Width	Height
40 mm.	2.03 m.
45 mm.	2.03 / 2.11 m.

## Crosspieces

■ Security crosspieces and angular profiles available in following finishes and sizes:

Golden / Matt Chrome / Nickel / Bronze  
Black enamel on steel

1 m. x 40 / 45 mm.

Golden / Silver finish aluminium

90 cm. / 1 m. x 40 / 45 mm.

M-type  
Lever protection box

V-type  
Lever protection box

## Boxes for lever protection

### ■ M-type

Protects central as well as accessory bolts from lever actions

### ■ V-type

Apart from protecting the central bolts from lever actions, it is provided with a special device to fit the latch.

## New

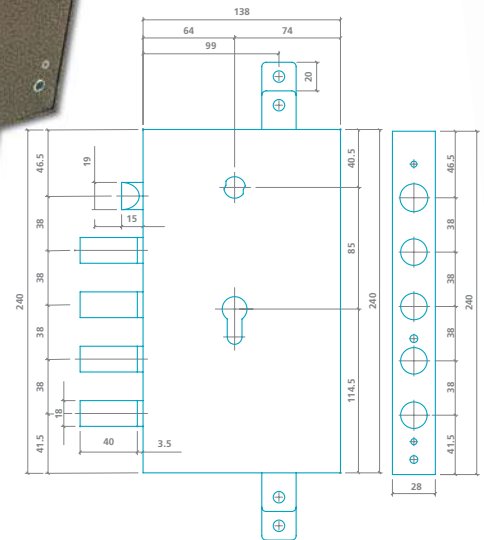

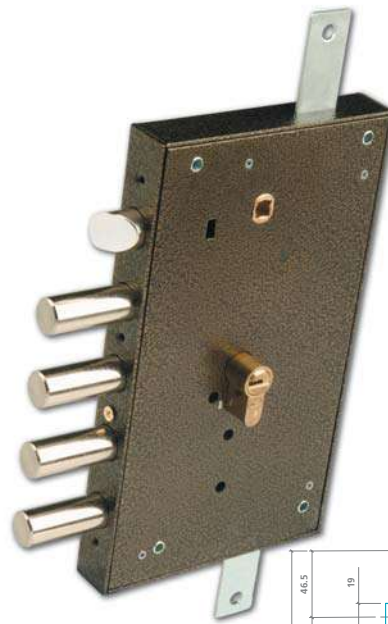

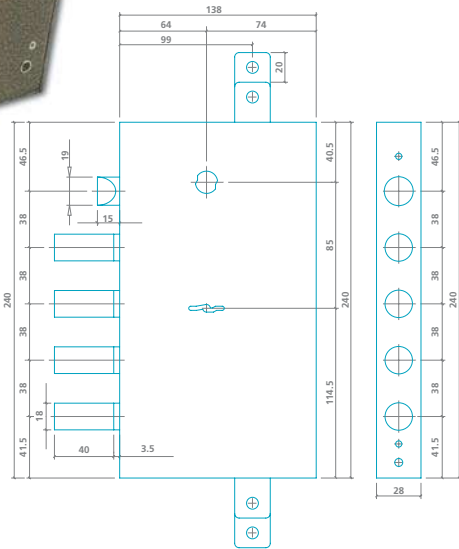

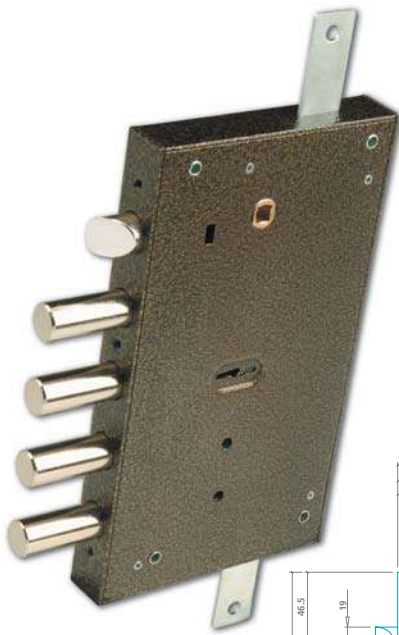

Every high security lock in this catalogue features an ANTIBREAKAGE SYSTEM, which effectively protects the central steel bolts from being forced backwards.

This system is PATENTED and CERTIFIED by an official approved centre.

## 70.B.00

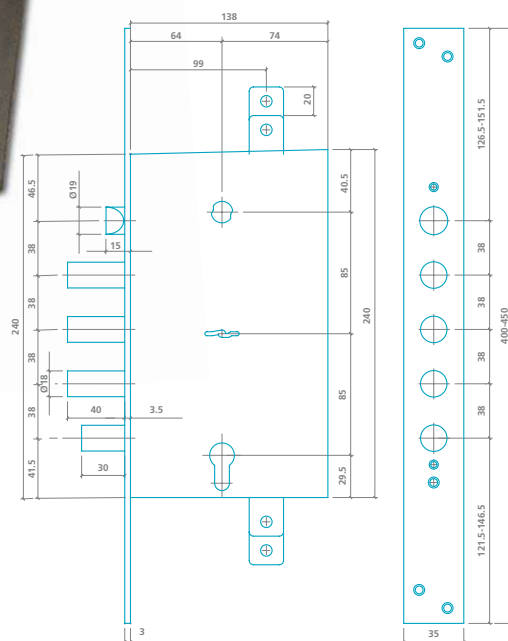

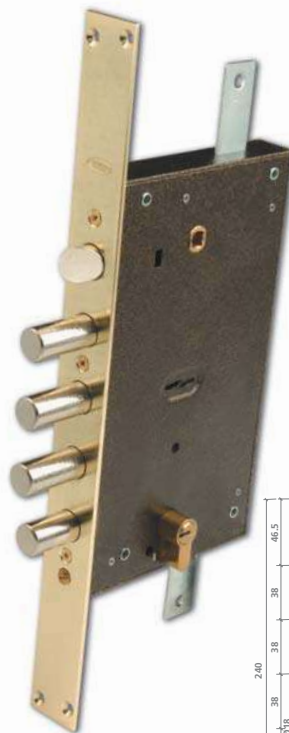

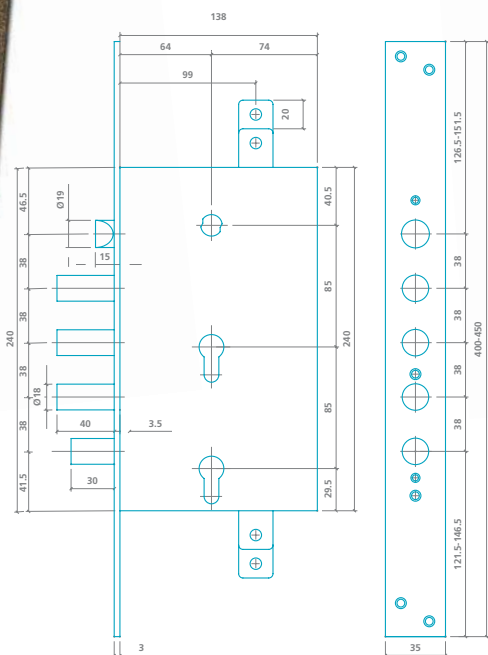

## 70.C.00

- ANTIBREAKAGE system
- Special Security Lever Lock by 6 independent lever tumblers
- Lever block protected by 3 mm. thick steel plate
- Round steel bolts Ø18 mm.
- 4 Turns
- Reversible Latch
- Backset 64 mm.
- Closed case
- Front & Striking plate 400 x 35 mm. available
- Fitting Up & down locking points
- Opposite side locking point available
- Available version with Service Key
- *Finishes:*
  - Brass
  - Chromed brass
- Security Escutcheon

- ANTIBREAKAGE system
- Special Security Cylinder Lock
- High Security Cylinder: DS-15, DS-10
- Round steel bolts Ø18 mm.
- 4 Turns
- Reversible Latch
- Backset 64 mm.
- Closed case
- Front & Striking plate 400 x 35 mm. available
- Fitting up & down locking points
- Opposite side locking point available
- *Finishes:*
  - Brass
  - Chromed brass
- Security Escutcheon

# 70.D.00.F 70.M.00.F

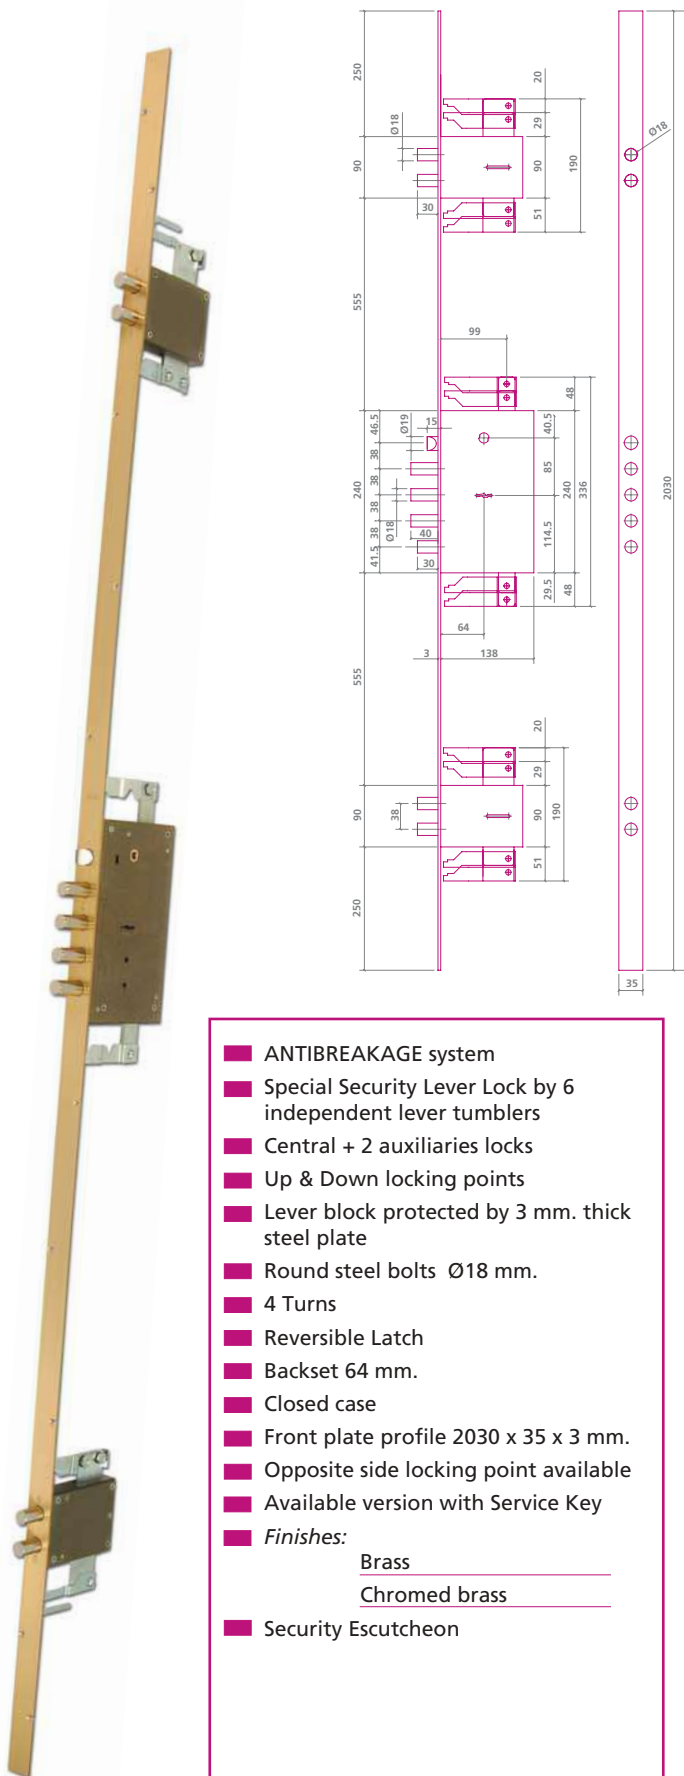

- ANTIBREAKAGE system
- Special Security Double Cylinder Lock; lower cylinder block the lock
- 2 x High Security Cylinder DS-15, DS-10
- Round steel bolts Ø18 mm.
- 4 Turns
- Reversible Latch
- Backset 64 mm.
- Closed case
- Front & Striking plate 400 x 35 mm. available
- Fitting up & down locking points
- Opposite side locking point available
- *Finishes:*
  - \_\_\_\_\_ Brass

# DS-15

**DS-15 Cylinder**

**DS-15 Switch cylinder**

- High security double cylinder with european profile.
- Front drilling resistant by tempered steel bars.
- Anti - picklock profile.
- Five reversible chromed brass keys.
- Double fitting 6 pin cylinder offering excellent technical features.
- High keying possibilities.
- Wide range of sizes, finishes and models : knob cylinders, half-cylinders, switch cylinders, double clutch cylinders, etc.
- Computerized manufacturing process in highly technological machines.
- **Finishes:** Brass/Chrome  
Matt chrome

# SEA 3 / SEA 23

SEA 3 / SEA 23 Cylinder

SEA 3 / SEA 23 Switch cylinder

- High security double cylinder with 22 mm swiss profile.
- Front drilling resistant by tempered steel bars.
- Five reversible nickelsilver keys.
- It combines a double row of suspended pins with an extra row at the flank, performing a perfect multilock system.
- High keying possibilities.
- Wide range of sizes, finishes and models : knob cylinders, half-cylinders, switch cylinders, double clutch cylinders, etc.
- *Finishes:* Brass/Chrome

85 mm.	(42.5-42.5)		85 mm.	(32.5-52.5)	

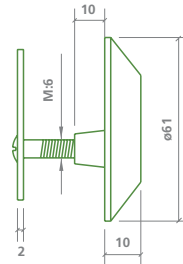

## Common features

- Useful protective escutcheons for our whole range of european & swiss cylinder mortise security locks.
- Specially designed to avoid grasping actions.
- Available Finishes:
  - Golden enamel
  - Chrome
  - Matt Chrome
  - Stainless Steel in 420-P & 425-P
  - Black / Bronze

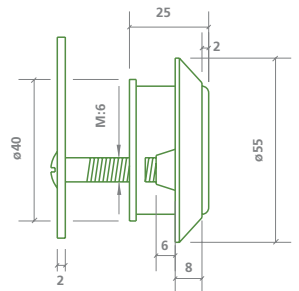

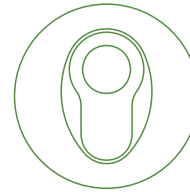

## 410-P

- Including two pieces: *escutcheon* and *internal plate* with inside fixing system.

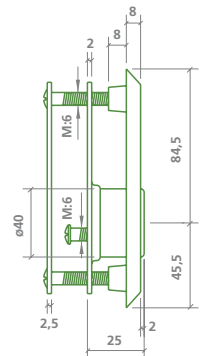

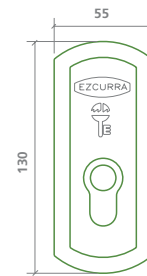

## 420-P

- Including three pieces: *escutcheon*, *internal plate* and *tempered steel cylinder's cap* with an edge that protects the cylinder from being extracted.

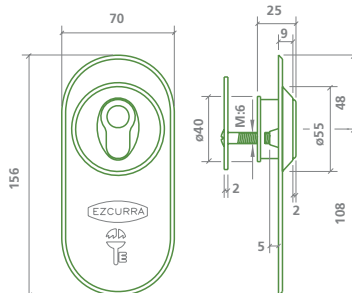

## 424-P

- Double security escutcheon.
- Including three pieces: *escutcheon*, *internal plate* and *tempered steel cylinder's cap* with an edge that protects the cylinder from being extracted.
- The *escutcheon* is fastened through the *internal plate* by a strong screw fixing system. The *cylinder's cap* is fixed by two screws through the lock.
- Available *steel plate* to be placed between the lock and the door's armouring sheet which provides highest protection of the lock and the cylinder, and avoids taking the cylinder's cap out.
- Available *decorative plate*.

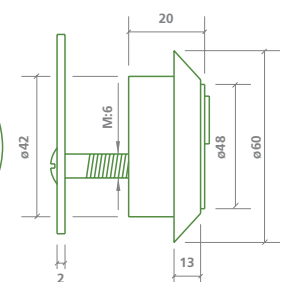

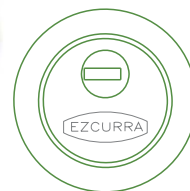

## 425-P

- 420-P escutcheon plus decorative plate.

## 430-P

- Including three pieces: *tempered steel escutcheon*, *internal plate* and *brass cover*.
- Hidden cylinder.
- Available washers for exact assembly.
- *Decorative plate* on request.

## New

Every high security lock in this catalogue features an ANTIBREAKAGE SYSTEM, which effectively protects the central steel bolts from being forced backwards.

This system is PATENTED and CERTIFIED by an official aproved centre.

## Master keying system

EZCURRA has developed a masterkeying system that provides Comfort, Performance and Security. For comfort, Ezcurra's master keying system affords the possibility to reduce the usual bunch of keys to only one, able to open the most commonly used locks and cylinders. High Performance and Security, due to the precision and excellent technical features of our cylinders, which allow all kind of keying systems, from the simple master key suite to the grand master key one.

In this way, house entrance doors, post boxes, elevators, garages, desk, and so on, all can be easily masterkeyed to user's convenience.

Nowadays housing, condominiums, offices, hospitals and companies of any size enjoy the quality and security of EZCURRA's master keying system.

### Comunal Entrance Master keying

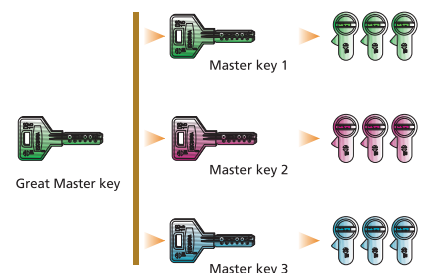

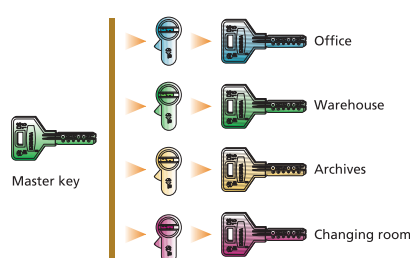

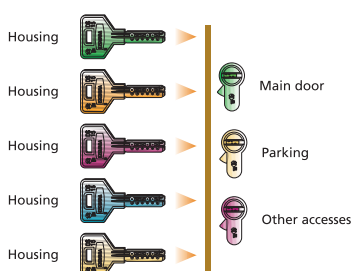

Group of Locks each one having its own individual key that gives access to its own door and all communal services i.e.: main entrance, garage, lift, terraces, storerooms, etc.

### Simple Master keying

Group of Locks each one having its own individual keys, which opens only that door, and a Master key which opens all the locks. Suitable for offices, warehouses, etc.

### Group Master keying

Several independent groups of Locks each one having its own Master key, and a Grand Master key, which opens all the doors in the locking plan. Suitable for hotels, administrative buildings, schools, companies, etc.

**EZCURRA**

## Common features

- Useful protective escutcheons for our whole range of european & swiss cylinder mortise security locks.
- Specially designed to avoid grasping actions.
- Available Finishes:  
Golden / Matt Chrome  
Nickel / Bronze  
Black enamel  
Chrome  
Stainless steel in 420-P,  
425-P & 430-P

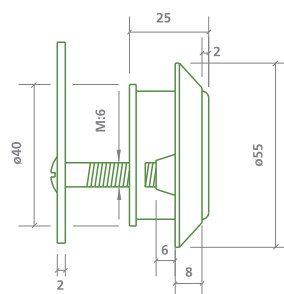

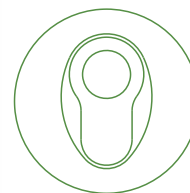

## 410-P

- Including two pieces: *escutcheon* and *internal plate* with inside fixing system.

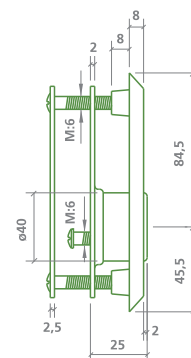

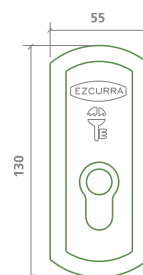

## 420-P

- Including three pieces: *escutcheon*, *internal plate* and *tempered steel cylinder's cap* with an edge that protects the cylinder from being extracted.

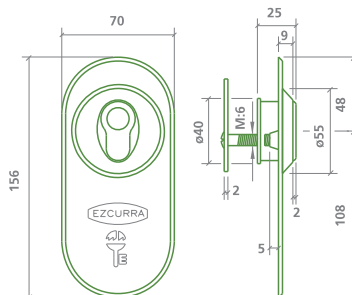

## 424-P

- Double security escutcheon.
- Including three pieces: *escutcheon*, *internal plate* and *tempered steel cylinder's cap* with an edge that protects the cylinder from being extracted.
- The *escutcheon* is fastened through the *internal plate* by a strong screw fixing system. The *cylinder's cap* is fixed by two screws through the lock.
- Available *steel plate* to be placed between the lock and the door's armouring sheet which provides highest protection of the lock and the cylinder, and avoids taking the cylinder's cap out.
- Available *decorative plate*.

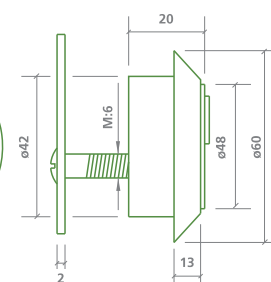

## 425-P

- 420-P escutcheon plus decorative plate.

## 430-P

- Including three pieces: *tempered steel escutcheon*, *internal plate* and *brass cover*.
- Hidden cylinder.
- Available washers for exact assembly.
- Decorative plate* on request.

M-type  
Lever protection box

V-type  
Lever protection box

## Boxes for lever protection

### M-type

It protects the central bolts from lever actions.

### V-type

It protects the central bolts from lever actions.

It is provided with a special device to fit the latch.

## long angular Striking Plate

45 mm.  
X 2,03 / 2,11 / 2,15 m.

## Guides and Anti-dust protectors

## Hinge

U+L shaped reversible SECURITY HINGE with 4 bearings, available in the following finishes and sizes:

Golden / Matt Chrome / Nickel Bronze / Black enamel on steel

Width	Height
40 mm.	2.03 m.
45 mm.	2.03 / 2.11 m.

## Profiles for doors and frames

Security crosspieces and angular profiles available in following finishes and sizes:

Golden / Matt Chrome / Nickel Bronze / Black enamel on steel  
1 m. x 40 / 45 mm.

Golden / Silver finish aluminium  
90 cm. / 1 m. x 40 / 45 mm.

## Cilindros de **alta seguridad** con **17 PITONES**:

**12 EN LÍNEA + 5 LATERALES**, que actúan combinadamente, dando como resultado un sofisticado sistema de seguridad que además aumenta exponencialmente sus posibilidades de **amaestramiento**.

Cilindros con **perfil europeo ANTIGANZÚA y ANTIBUMPING**.

**Protección frontal ANTITALADRO** por anilla de acero templado en el tambor y barra en el canuto.

Disponibles en una amplia gama de medidas, acabados y versiones: doble embrague, microconmutadores, con pomo, medios cilindros, etc.

**FABRICACIÓN ÍNTEGRA EN ESPAÑA** bajo norma UNE-EN 1303:2006.

## **High security** cylinders with **17 PINS**:

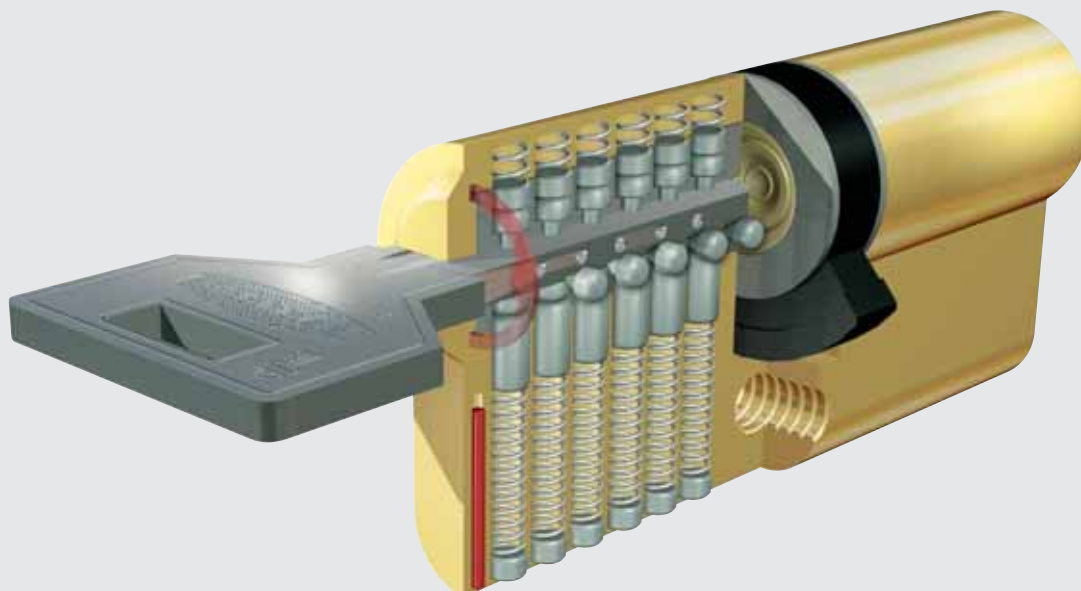

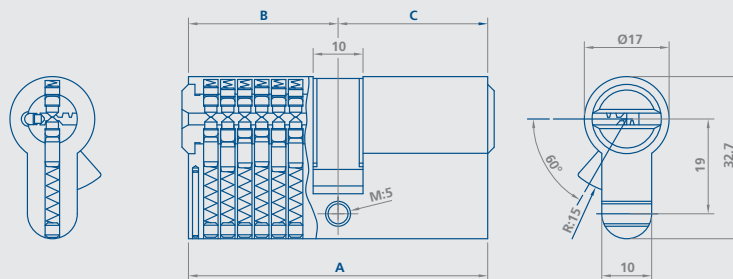

**12 in two rows + 5 in an extra side row**, acting to achieve a sophisticated **ANTIBUMPING** security system which increases exponentially its **master keying** possibilities.

Cylinders featuring european **ANTI-PICKLOCK profile**.

**Front DRILLING RESISTANCE** by tempered steel ring in the drum and tempered steel bar in the tube.

Available in a wide range of sizes, finishes and versions: double clutch cylinders, switches, knob cylinders, half cylinders, etc.

**Completely MADE IN SPAIN** in accordance with regulation UNE-EN 1303:2006.

## Sistema de amaestramiento

EZCURRA ha desarrollado un sistema de amaestramiento que proporciona Comodidad, Eficiencia y Seguridad.

**Comodidad** por reducir el manejo de diferentes llaves, permitiendo abrir con una sola todas las cerraduras y cilindros habitualmente utilizados.

**Eficiencia** por permitir todo tipo de combinaciones y amaestramientos, desde una sola maestra hasta una gran maestra.

**Seguridad** por su alto grado de precisión, estando todos los amaestramientos codificados.

El sistema de amaestramiento de EZCURRA permite una gran variedad de combinaciones y variaciones, manteniendo la autonomía de cierre de cada una de las dependencias, optimizando su control y manejo.

Por todas estas ventajas, el sistema de amaestramiento de EZCURRA es demandado para comunidades de vecinos, viviendas unifamiliares, oficinas, fábricas, hoteles, hospitales y cualquier instalación de uso múltiple.

## Master keying system

EZCURRA has developed a masterkeying system that provides Comfort, Performance and Security. For comfort, Ezcurra's master keying system affords the possibility to reduce the usual bunch of keys to only one, able to open the most commonly used locks and cylinders. High Performance and Security, due to the precision and excellent technical features of our cylinders, which allow all kind of keying systems, from the simple master key suite to the grand master key one.

In this way, house entrance doors, post boxes, elevators, garages, desk, and so on, all can be easily masterkeyed to user's convenience.

Nowadays housing, condominiums, offices, hospitals and companies of any size enjoy the quality and security of EZCURRA's master keying system.

## Amaestramiento de Comunidades

Grupo de cerraduras –independientes entre sí– cada una con sus llaves propias, las cuales abren también servicios comunes como entrada principal, garaje, ascensor, cuartos comunitarios, etc.

## Amaestramiento Simple

Grupo de cerraduras cada una con sus propias llaves individuales, y una llave maestra que abre todas las cerraduras. Apropiado para oficinas, almacenes, etc.

## Amaestramiento en Grupos

Varios Grupos de cerraduras independientes, cada grupo con su llave Maestra, y una Gran Maestra que abre todas las cerraduras. Indicado para edificios públicos, hoteles, empresas, etc.

Este amaestramiento puede tener otras complejas variantes.

## Comunal Entrance Master keying

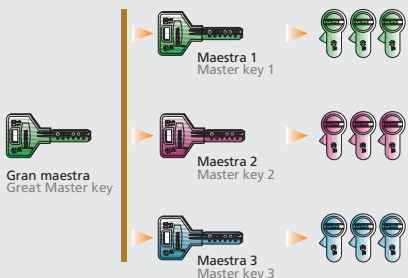

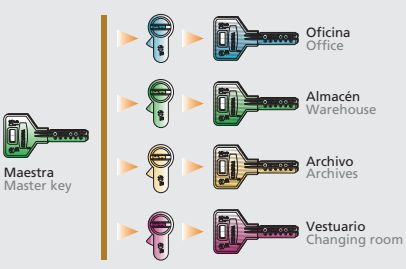

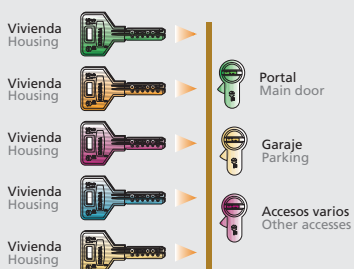

Group of Locks each one having its own individual key that gives access to its own door and all communal services i.e.: main entrance, garage, lift, terraces, storerooms, etc.

## Simple Master keying

Group of Locks each one having its own individual keys, which opens only that door, and a Master key which opens all the locks. Suitable for offices, warehouses, etc.

## Group Master keying

Several independent groups of Locks each one having its own Master key, and a Grand Master key, which opens all the doors in the locking plan. Suitable for hotels, administrative buildings, schools, companies, etc.

**Sistema automático de cierre  
Automatic Closing System**

**clank!!**

Cuando se cierra la puerta, las barras de cierre se proyectan **automáticamente 1 vuelta**, quedando la puerta **totalmente cerrada** sin necesidad de operar el **cilindro**.

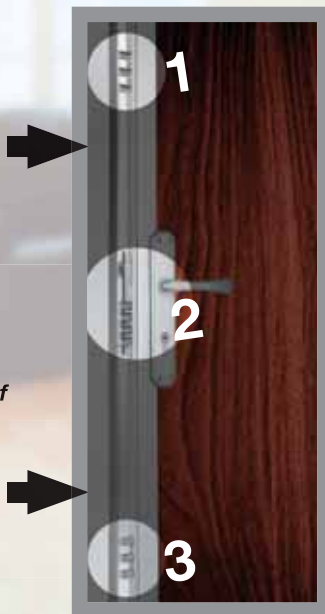

En versión **Multi-Punto** se proyectan simultáneamente las barras de cierre de caja central y auxiliares, obteniendo un **cierre simultáneo**.

Para **mayor seguridad** la **segunda vuelta** puede ser activada por medio del **cilindro**.

*When closing the door, the 4 deadbolts of the lock are **automatically** projected **one throw** and **the door pulls itself closed**.*

*And in the **Multi-Point** version the main and auxiliary locks are projected at the same time.*

*For **more security**, the **second throw** can be activated by the **cylinder**.*

Para la apertura, accionando la manilla se retraen **simultáneamente el picaporte y las barras**, tanto si está activada la 1ª como la 2ª vuelta.

Esta Nueva Cerradura Ezcurrea mantiene el **Alto Estándar de seguridad EZCURRA**.

*To open the door pull down the handle and the main lock deadbolts and the latch bolt will withdraw **simultaneously**, so much being activated the first as the second throw.*

*This New Ezcurrea Lock maintains the **High EZCURRA Security Standard**.*

## Cierre Automático y Apertura Anti-Pánico

*Automatic Closing & Anti-Panic Opening Device*

**Nueva cerradura Ezcurrea con doble función**  
**New Ezcurrea Lock system with dual function**

## APLICACIONES

Para todo tipo de **puertas nuevas**, con una **amplia gama de posibilidades**.

### Actuando como Sistema de Bloqueo.

Cada cerradura opera individualmente, tanto con cilindros de llaves independientes como con llaves iguales o amaestradas.

### Actuando como Sistema de Bloqueo y Restricción.

El sistema opera cada cerradura separadamente, pero los cilindros están amaestrados. La llave de la Cerradura Extra opera ambas cerraduras, y el sistema Multi-Punto opera únicamente con su llave. Esta modalidad permite al usuario principal monitorizar el acceso de terceros en cualquier momento.

### Actuando como Sistema de Control de Accesos.

La función anterior puede ser ampliada creando un grupo de cerraduras Multi-Punto relacionadas por un sistema de amaestramiento. Esta función permite monitorizar el acceso a grupos tan complejos como se requiera.

## APPLICATIONS

*Suitable for new doors, with a **great range of possibilities**.*

### *Acting as Security Blocking System.*

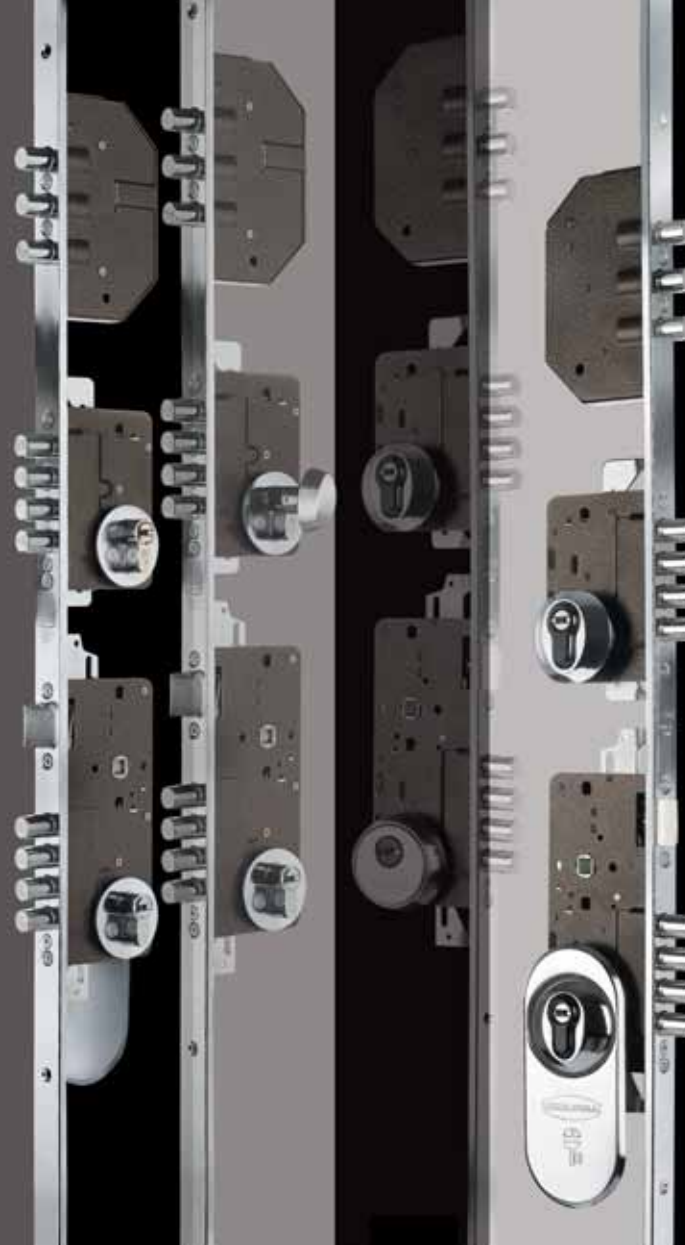

*The system is individually activated by each lock. Both cylinders are operated by their own key, even if keys are alike or master keyed.*

### *Acting as Block & Restriction System.*

*The system operates each lock individually, but the security cylinders are master keyed: the Extra-Lock key operates both locks, and the Multi-Point lock is operated only by its own key. This allows the main user to block and monitor access of a third party anytime.*

### *Acting as Access Control System.*

*The previous feature can be enlarged creating a Multi-Point locks group linked by master keying. This allows monitoring access of as complicated groups as required.*

**bloqueo**  
*block*

**restricción**  
*restriction*

**control acceso**  
*access control*

**Sistema Bloqueo Multi-Punto**  
**Blocking Device System**

**EZCURRA**

e-mail: [info@ezcurra.com](mailto:info@ezcurra.com) · [www.ezcurra.com](http://www.ezcurra.com)

La cerradura Multi-Punto opera como habitual: cerradura central y auxiliares son activadas simultáneamente por el cilindro de la caja central.

El Sistema Multi-Punto **puede ser bloqueado** con la **cerradura extra**: cuando se activa la cerradura extra, las barras de cierre son proyectadas y **automáticamente bloquea** el sistema Multi-Punto.

*The Multi-Point lock works as usual: Both main and auxiliary locks are activated by the cylinder of the main lock, thus the door is closed.*

*The Multi-Point locking system **can be blocked by the independent Extra Lock**: when the cylinder of the Extra Lock is activated, its deadbolts are projected and the Multi-Point system is **automatically blocked**.*

El **Sistema de Bloqueo** mantiene el alto estándar de seguridad de **EZCURRA**, e incluye **Sistema ANTI-PALANCA®**

*The **Blocking Device System** maintains the **High EZCURRA Security Standard**, and includes **EZCURRA ANTI-LEVERAGE® SYSTEM**.*

**bloqueo  
block**

**restricción  
restriction**

**control acceso  
access control**

**Para la apertura**, la Cerradura Extra debe ser abierta primero, y entonces el sistema multi-punto estará **desbloqueado**.

El Sistema **ANTI-PALANCA®** de **EZCURRA** está también incorporado.

*To **open the door**, the Extra Lock should be opened first, thus the Multi-Point system is **unlocked**.*

*The protection against forced entry by **EZCURRA ANTI-LEVERAGE® system** is also incorporated.*

**Significativo incremento del estándar de seguridad.**  
**Aumento de la resistencia anti-intrusión.**  
**Dificultando la violación por manipulación.**
